

To whom it may concern

I am delighted to compose a recommendation letter for Mr. Hasan, whose development I have observed over the past decade. Throughout this time, he has grown academically and personally, emerging as a mature individual well-prepared for graduate study. Mr. Hasan is not only bright, energetic, and compassionate but also genuinely well-rounded.

During my time teaching, I noticed his attentiveness and enthusiasm for the subject matter, reflected in consistently above-average grades across all undergraduate semesters. I have closely supervised his research endeavors, guiding him through several projects at the undergraduate level, and he is currently engaged in a research project under my supervision. We collaborated on numerous research papers, notably contributing to the publication of "Factors Associated with Coronary Heart Disease among Elderly People in Different Communities," featured in a reputable journal ([click here](#)). Additionally, we co-authored several research works that were published in high-impact journals. Apart from that, we also published several research works in high-impact journals. So, his intuitive and patient approach to the intricacies of research is commendable.

Beyond his academic and research achievements, Mr. Hasan actively participates in a diverse array of extracurricular activities, including cultural events, social welfare initiatives, and leadership roles. Currently serving as a Monitoring and Evaluation Officer at the Monitoring and Evaluation Department of Green Hill-Community Partners International, Bangladesh, he is dedicated to assisting Rohingya refugees with their essential health and humanitarian needs, underscoring his commitment to making a positive societal impact.

I believe Mr. Hasan is an outstanding candidate with a potent enthusiasm to excel in any graduate program within the field of Statistics. I wholeheartedly recommend him and wish him the very best in all his future endeavors.

Should you require any further information or clarification, please do not hesitate to contact me.

Sincerely,

[Dr. Kanis Fatama Ferdushi]
Professor, Department of Statistics,
