To Whom It May Concern

I am pleased to recommend Mr. Mohammad Nayeem Hasan for the Graduate Program at your esteemed university. I have had the privilege of knowing Mr. Hasan since 2013 when he joined Shahjalal University of Science & Technology's Department of Statistics.

In my role as an educator, I have consistently been impressed by Mr. Hasan's dedication and passion for his subjects. His deep comprehension of the coursework is evident from his consistently above-average grades throughout his undergraduate studies. Not only was he an active participant in my BSc (Honours) course, but he also excelled as a research assistant, co-authoring several research projects and publications.

Under my guidance beginning in 2015, Mr. Hasan showcased his academic prowess, particularly in courses such as Statistical Computing I (STA332) and its lab component (STA332L), where he achieved a perfect Grade Point of 4 out of 4. His M.S. thesis titled "Ground Water in the Vicinity of Sylhet City, Bangladesh: Assessment of Quality and Association Based on Multivariate Statistical Techniques" was not only sponsored by the University Research Centre but also published in a respected journal.

Beyond individual efforts, Mr. Hasan's contributions to research groups within our department have been exemplary. His ability to collaborate effectively and coordinate group efforts, combined with his robust understanding of research methodology, has led to over 30 publications in prestigious international journals. Of these, 10 were conducted under my direct supervision.

In addition to his academic achievements, Mr. Hasan has showcased his dedication through extensive extracurricular involvement. Before his professional endeavors, he served at the University Research Center of Shahjalal University of Science & Technology. His experience spanning three years in the developmental sector, research institutions, and survey teams speaks volumes about his commitment. Currently, he holds a position as a Monitoring and Evaluation Officer at Green Hill-Community Partners International, Bangladesh, where he is deeply involved in aiding Rohingya refugees with their critical health and humanitarian needs.

Given Mr. Hasan's remarkable academic track record, collaborative spirit, significant research contributions, and professional growth, I am confident in his suitability for advanced PhD research. With the expanding Public Health sectors in Bangladesh offering ample research prospects, I believe that, upon completion of his PhD, Mr. Hasan will leverage his expertise for the betterment of both Bangladesh and the USA.

Mr. Hasan's exemplary communication skills and his capacity to spearhead research projects make him a standout candidate. I wholeheartedly endorse his application for research studies at your renowned institution and wish him a bright and prosperous future.

Sincerely,
[Dr. Md. Jamal Uddin]
Professor, Department of Statistics,
